Burt can help with recognizing the shell part that is deformed but I don't want him doing any cutting or grinding as he does not have medical monitoring. Please get him to do this while he's over this week so he doesn't need to make a special trip over to do it.

Subject: DB QAPP comment

Katie and I were discussing the recent draft QAPP and noticed the text lined out from section 3.4.1, step 4, "Seattle staff will assist with sample preparation." We're going to need this support from someone that can recognize the shell parts that are considered discolored or deformed. It won't be obvious to us here. Can we leave this text in?
